-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1)  Responsive to communication(s) filed on 21 August 2003.
- 2a)  This action is FINAL.
- 2b)  This action is non-final.
- 3)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/21/2003 has been entered.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 4-15 are rejected under 35 U.S.C. 102(e) as being anticipated by STEEN et al. (6,213,995).  
STEEN (Fig. 1-2) discloses a vascular catheter comprising inner layer 30, outer layer 32 and reinforced layer including at least two first wires 20 of stainless steel (col. 5, lines

Art Unit: 3731

20-23) for increased tensile strength and toughness (col. 5, lines 30-33) and two highly radiopaque metal wires 44 of gold or silver or platinum (col. 5, lines 14-18) as recited in the claims.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 19-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over STEEN et al. (6,213,995).

STEEN discloses substantially all limitations in the claims, except for highly radiopaque wire 44 of tungsten. However, it is well known in the art that platinum and tungsten are highly radiopaque materials with high tensile strength. It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute wire 44 of platinum by wire 44 of tungsten as this substitution would provide STEEN catheter some degree of radiopaqueness.

2. Claims 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over STEEN et al. (6,213,995) in view of SATER et al. (6,068,622).

As to claims 16-18, STEEN discloses substantially all limitations in the claims, except for sections of the catheter of distally decreasing stiffness and a soft distal tip.

Art Unit: 3731

However, SATER (col. 4, paragraph 4 and col. 6, lines 58-66) discloses SATER catheter having sections of distally decreasing stiffness and soft tip 40 without reinforcing layer for easy and safe navigation of the catheter in a body lumen. In view of SATER, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide STEEN catheter the features taught by SATER so as to have more flexibility toward the distal end of the STEEN catheter for safe and easy deployment of the catheter.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 703-306-3420. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J Milano can be reached on 703-308-2496. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
